US Citizen in New York City, NY

Education & Certificates

- Masters in Computer Science at Western Governors University Expected 2027
- Bachelors in Biology at Stony Brook University Status - Graduated
- LPI Linux Essentials and ITIL 4 Foundation

Work History

Software Developer, Freelance, NY

April 2026 to Current

- Developed a medical practice website using JavaScript, TypeScript, HTML/CSS, and React to establish an online presence for BingJing Roberts Ophthalmology and attract new patients using SEO best practices.
- Built a CI/CD pipeline using Git, Github, and Github Actions and Google Cloud Platform (GCP) to automate deployment to linux based servers.
- Coordinated meetings with clients to validate requirements, refine UI/UX elements, and adjust functionality based on client feedback.

Projects

Portfolio Website | [Live](#)

- Developed a portfolio website using JavaScript, TypeScript, HTML/CSS, Astro, and React to display my software development projects.
- Used Python, REST API, Playwright, MongoDB, and Github Developer API to connect to my backend to github and store up-to-date information about my projects.
- Built a CI/CD pipeline using Github Actions, Docker, and Google Cloud to enable quick deployment of the website after updating it.

Patient Healthcare App - TripleTen Sponsored Internship | [Repo](#)

- Created reusable components using Javascript, Typescript, HTML/CSS, and React Native for patient on-boarding page to streamline sign-up and improve overall user experience.
- Met with team for weekly AGILE stand-ups and code reviews to evaluate feedback, refine coding practices, and address concerns prior to making pull requests on GitHub.

New York City TileMap Server | [Link](#)

- Deployed a Dockerized geospatial tile API using TileServer GL, Nginx, and Cloudflare to serve New York City vector map data for location-based web applications.
- Integrated the RESTful API with client-side MapLibre applications to display self-hosted New York City map data without relying on third-party map providers.

Japanese Keyboard Typing Game | [Repo](#)

- Developed a Japanese kana typing practice application using JavaScript, TypeScript, React, and HTML/CSS to support interactive language learning and typing accuracy practice.
- Built a responsive frontend interface for displaying kana prompts, handling user input, and providing immediate practice feedback during typing sessions.

Technical Skills

Frontend - JavaScript, TypeScript, HTML, CSS, React, Astro, TailwindCSS

Backend - ASP.NET, Node.js, Express.js, RESTful API, JWT Authentication, MongoDB

Developer Tools - Git, GitHub Actions, Docker, Nginx, Google Cloud Platform (GCP), VS Code
